

Stephen Wolbers

Echotek Processing -- Eric James

- Eric's transparencies can be found in the AD doc DB as #1351.

- Eric is still waiting for the board schematics and for the FPGA code. Both are expected quite soon. In the meantime his update was given based on reading the documentation.

- The details can be found in Eric's talk and everyone is referred to it. There were quite a few questions and a few clarifications and they will be followed up in future meetings.

AOB:

- Gustavo will be speaking in a future meeting (this Thursday?) about the Graychip and processing options and clarification of features such as the 2.5 kHz peak that was seen in his last talk.
