Integration Tasks

- Verify new version of EchoTek modules.
- Derive operational modes of Greychip.
- Verify new version of timing card.
- Change FE software to operate and communicate with new hardware.
- Change on-line software to communicate with new FE software.
- Derive operational modes of new hardware.

Hardware Resources

- VME Crates:
- VME Processors:
- Old & New ET Modules:
- Old & New Timing Modules:
- Beam Simulation:
- Filter Boards:
- Accelerator Clocks (TCLK, BSYNC)
- Scopes:
- Signal Generators:

Software Resources

- R25 (Recycler BPM Diagnostics)
- Recycler Drivers
- New EchoTek Drivers
- Recycler Classes and Libraries
- New Frontend Code
- LabView
