

Weekly delivered luminosity after the long shutdowns of 2006 and 2007 (there were two recent long shutdowns, resulting to no stores between February 23, 2006 to June 8, 2006, and August 5, 2007 to October 27 , 2007)

January 25, 2009

Vaia Papadimitriou

# Weekly delivered luminosity after the 2006 long shutdown

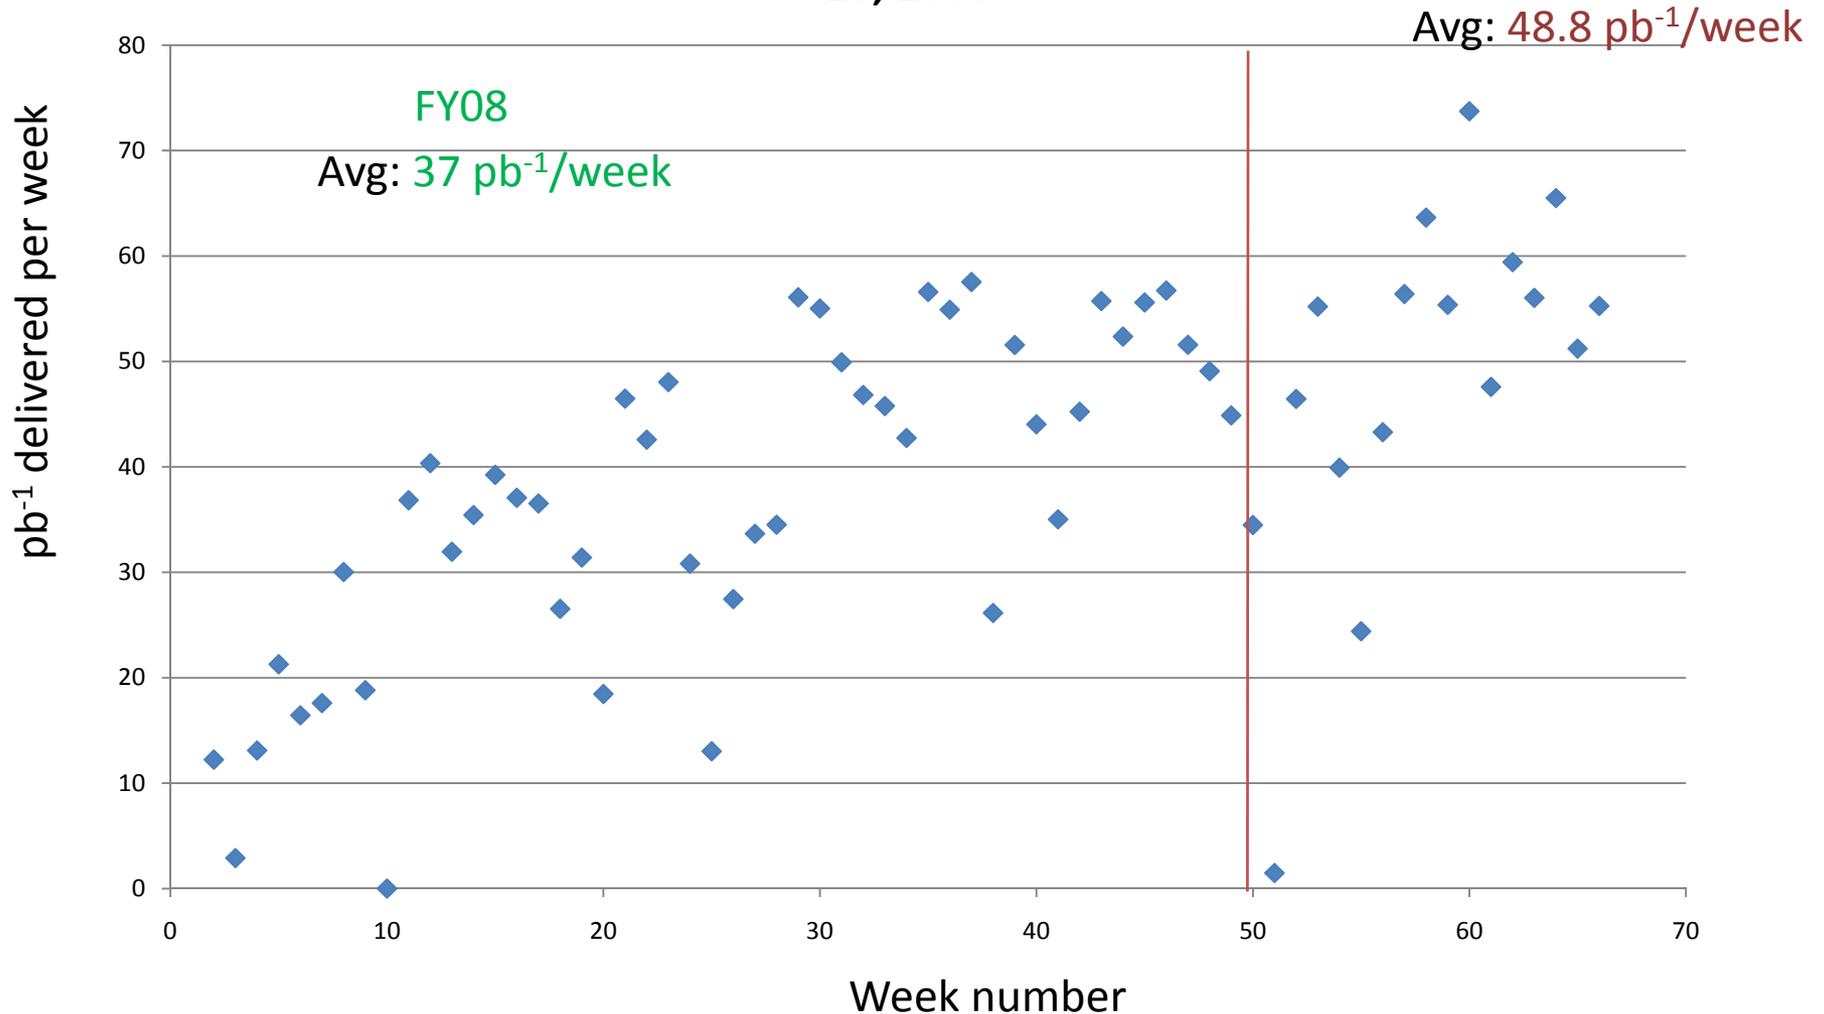

weekly lum delivered pb-1 as a function of week

# Weekly delivered luminosity after the 2007 long shutdown

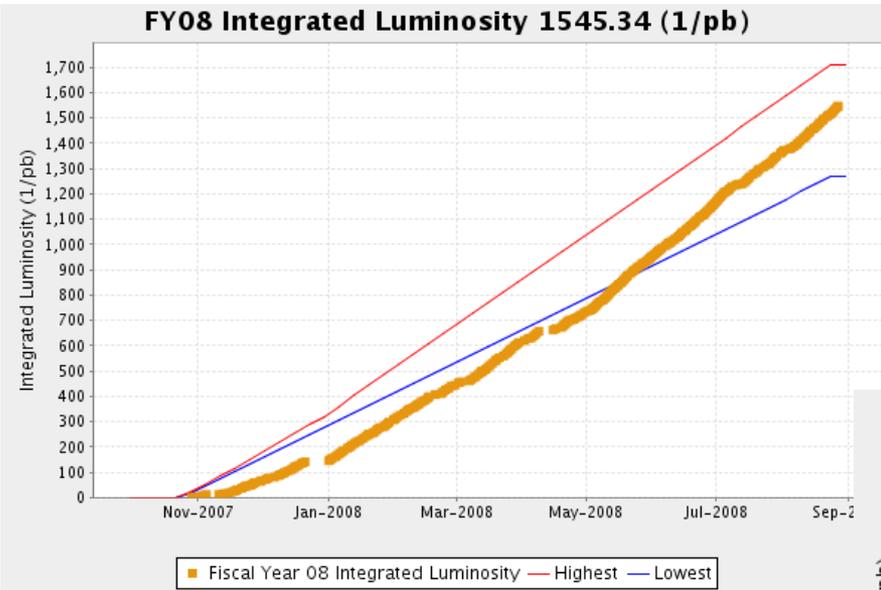

weekly lum pb-1 vs week number - October 29, 2007 - January 25, 2009

FY09

# FY08 delivered luminosity

Up to August 27, 2008 (beginning of expected shutdown) and up to October 1, 2008.

The model prediction was 30-41 pb<sup>-1</sup> per week in FY08, and as can be seen in the previous page we averaged 37 pb<sup>-1</sup> per week.
