

Notes from MI/RR Meeting - 26 Feb 2003 by Bruce Brown Notes on 10 March 2003

Vincent Wu -- 2.5 MHz Acceleration in the Main Injector

Vincent provided his presentation in PowerPoint format. It was updated today (March 10). You may find it as [2.5 mhz acceleration in the Main Injector](#) in the Beams Document Database.

Chandra Bhat -- RR RF Issues Revisited

Please find Chandra's presentation as [RR RF Issues Revisited](#).

Brajesh Choudhary -- Main Injector BPM Requirements Document

Brajesh was given only a few minutes to highlight the BPM requirements document which was being prepared for a review. Since the minutes were not prepared until now, I can report that both the presentation and the document are available from the Beams Document Database. You may find the presentation as [REQUIREMENTS FOR THE MAIN INJECTOR & ASSOCIATED TRANSFER LINES BPMs INCLUDING THE NuMI BEAM LINE](#) while the review document is [MAIN INJECTOR BPM SYSTEM UPGRADE + NUMI BEAMLINE BPM REQUIREMENTS](#)
